

**PURPOSE AND INTENDED AUDIENCE**

The goal of this CME activity is to update and educate ophthalmologists on new diagnoses and treatments of eye disease and to provide instruction on how to incorporate these treatments into daily clinical practice. It includes descriptions and updates on new vision research that have clinical implications. The target audience includes comprehensive and subspecialist ophthalmologists on the front lines of patient care, whether in private practice or in academic medicine.

**EDUCATIONAL OBJECTIVES**

- Upon completion of this program, participant learners should be able to:
- Understand the impact of oral nutrient supplements and the effect of the Mediterranean diet on age-related macular degeneration.
  - Recognize the fact that cataract surgery does not accelerate the rate of progression of age-related macular degeneration.
  - Discriminate between morality and ethics\*
  - Discuss the rationale for specific codes of ethics for the profession
  - Define curricular elements for teaching ethics
  - Incorporate contextual as well as “competing goods” in decision-making
  - Explore the intersection between academia and private practice in ophthalmology.
  - Learn from real-life case studies where practical and high-volume realities of community-based patient care meet with the expertise of a tertiary care center

**CONTINUING EDUCATION CREDIT**

In support of improving patient care, this activity has been planned and implemented by the University of Iowa Roy J. and Lucille A. Carver College of Medicine and Iowa Eye Association.
